

HPURE AUTOTRONIC CVTF HI

Product Description

Continuously Variable Transmission Fluid blended with high-performance fully synthetic base oils and carefully selected additives, including friction modifiers, detergent-dispersants, oxidation inhibitors, viscosity index improvers, corrosion inhibitors, and defoaming agents.

This is a new multi-vehicle automatic transmission fluid specially designed for use in latest generations of Continuously Variable Transmissions (CVT) which transfer traction via steel-made traction chains or belts. It provides outstanding power transmission ratios and better fuel-economy performance as compared with the regular automatic transmissions, with much more car makers adopting CVTs in more vehicle models.

Applications / Benefits

- γ Provides excellent friction, oxidation and thermal stability
- γ Outstanding anti-wear properties and oil film thickness
- γ Excellent shear stability for consistent shift
- γ Compatible with a wide range of seals
