

THE BRAND

About Us

Hpure lubricant, its trade name registered in many countries, operates through headquarters in Singapore to distribute its own products across the Asia Pacific region. We bring the latest innovative US advanced lubricant technology, combined with Group II hydrocracked base stock to make the best quality of lubricants. In addition, Hpure strives towards its primary mission of producing and supplying quality lubricants and services to our clients at competitive pricing, and delivering customer satisfaction.

Value for Money

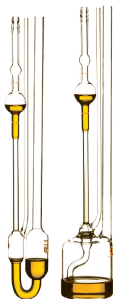

We believe in reliably providing our customer with performance product at a price level considered as "Value for Money". With today's technology developing rapidly requiring higher performing lubricants, we are committed to meet industry demands with a range of products that are technology-led. Giving our customers "Value for Money" continues to be our brand's core value. This enables our customers to be more competitive using the full set of benefits from our competitively priced products.

Institutional Certified

Hpure lubricant is an official EOLCS (Engine Oil Licensing and Certification System) licensee, of which the EOLCS certification on the products allows consumers to identify quality engine oils for their vehicles. Hpure's products aim to meet the performance requirements, test methods and limits, which are established cooperatively by API, vehicle and engine manufacturers and automotive engineers from the various established and qualified institutions.

Quality Control

Hpure products are manufactured by an ISO 9001 : 14001 certified company to meet API (American Petroleum Institute) and SAE (Society of Automobile Engineers) Standards, under the stringent ISO quality control system to ensure quality and consistency of its products. In addition, Hpure is armed with a well-equipped laboratory and experts to guarantee product integrity, ensuring that ASTM (American Society of Testing and Materials) standards are met.

PRODUCT RANGE

AUTOMOTIVE LUBRICANTS

We have a wide range of synthetic and mineral oil based products for the gasoline, diesel (heavy & light duty) and gas (LNG, CNG, LPG) driven engines. We also have a full range of motorcycle oils for consumers in countries that rely on and prefer this mode of transport.

INDUSTRIAL LUBRICANTS

We have a wide range of synthetic and mineral oil based products for the needs of earth moving, mining, construction, transportation and manufacturing industries. They are formulated and manufactured to meet major OEM's specification requirements.

MARINE LUBRICANTS

Working with shipyards in the region, we have developed a range of products for 2 & 4 stroke gasoline, diesel or heavy fuel powered engines of sea-going vessels & tankers, fishing fleets and leisure crafts.

SPECIALTY FLUIDS

Formulated to meet the requirements of the modern vehicles and machines, these fluids include Automatic Transmission Fluids (ATF), Fluids for Continuously Variable Transmission (CVT) & Dual Clutch Transmission (DCT), Gear Oils, Brake Fluids, Antifreeze, & Coolants and Shock Absorber Oils.

METAL WORKING FLUIDS

We customize lubricants for the varied and stringent demands of the metal working industry. Typical applications are stamping, punching, rolling, and lathe operations, etc.

AFTERMARKET

Treatments for fuel and engine oils are specially blended in our facilities to restore engine power and enhance engine performance. These aftermarket products meet the needs of car & motorcycle enthusiasts who have a strong Do-It-Yourself (DIY) culture.

GREASE

Our products are based on carefully selected base fluids in combination with proven thickener technology and carefully crafted additive systems. The greases are designed to meet a wide variety of operating conditions in both industrial and mobile equipment, including extreme applications such as high temperatures, water contamination, heavy or shock loads, or variable speeds.
