### PRODUCT CHARACTERISTICS

- Blended with High Quality Base Oils by Patented Technology
- Fully Synthetic Oil Meeting Highest API Standard for Gasoline Engine
- Superb Extended Drain Capability & Fuel Saving Efficiency
- High Temperature Engine Protection for Tough Conditions

## GASOLINE ENGINE OILS NITRON ADVANCE SERIES

Nitron Advance Series range is well formulated with Synthetic & Group 2 base oils with cutting-edge blending technology to achieve low emissions, fuel economy and extended drain capability.

### GROUP 2 HYDRO-TREATED BASE OILS

Group II base oils are defined as being more than 90 percent saturates, less than 0.03 percent sulfur and with a viscosity index of 80 to 120.

It is formulated using hydro-treated technology, based oil which is a more complex process than what is used for in lower group base oils. As a result, Group II base oils have better thermal stability properties, achieving superior engine durability and oil efficiency.
